WHAT IS AIRLESS?

AIRLESS DEFINITION

“An airless packaging is a non-pressurized, tamper-proof, dispensing system, combining a mechanical pump with an airless filled and sealed container, which delivers the product with no intake of air. The container is either deformable, or rigid, with a piston or a pouch.”

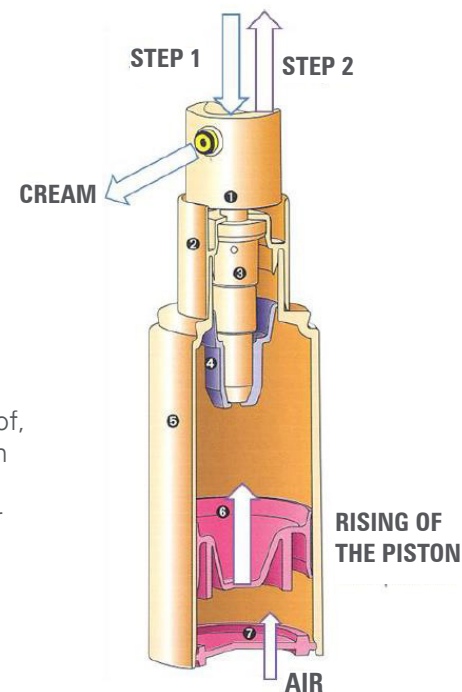

AIRLESS ADVANTAGES

- ✓ Good restitution rate for formulas
- ✓ No contact between outside air or formula
- ✓ Usage in any position

AIRLESS WORKING PRINCIPLE

Airless dispensers work without allowing air to get back into the bottle. It is characterized by a changing volume of the bulk container.

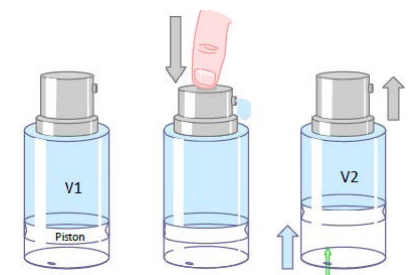

1 VOLUME OF EXPELLED FORMULA = 1 movement of piston to compensate the expelled formula.

AIRLESS BOTTLE TYPE

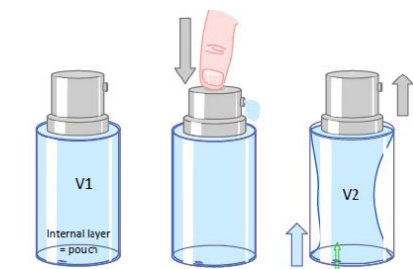

PISTON AIRLESS

Principally round, but also available in oval and square as well. When the piston is rising, air enters at the bottom of the bottle (hole vent) to equilibrate the pressure due to the diminution of the formula when it's expelled. No air contact with formula.

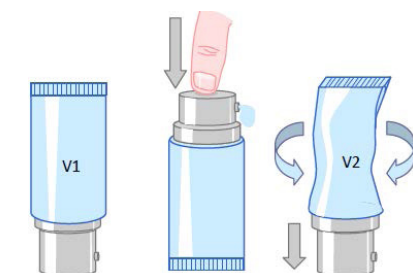

POUCH AIRLESS

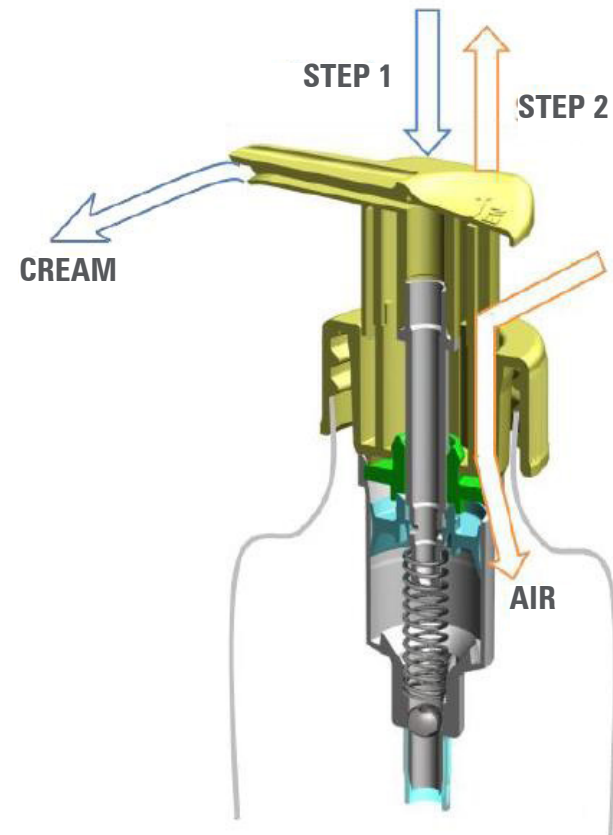

Principally, a squeezable pouch is placed into a rigid bottle to keep the external shape during usage. To equilibrate the pressure due to the diminution of the formula when it's expelled, the air enters into the bottle in-between the pouch and the bottle. No air contact with formula.

PUMP TUBE AIRLESS

Principally, a plastic tube with or without EVOH layers are used. An airless engine on top of a plastic tube will squeeze the tube during usage. No air contact with formula. External tube shape not maintained.

DISPENSER SYSTEM

DISPENSER TYPE

- Atmospheric Pump
- Mist Pump
- Foam Pump

DISPENSER WORKING PRINCIPLE

Air movement within the pump and bottle is a basic principle for the dispenser to work. For one dosage of formula getting out, an equal air quantity enters back into the bottle by the hole vent.

1 VOLUME OF EXPELLED FORMULA =
1 volume of air entering the bottle

SINGLE WALL
COMPONENTS

HCT01-10

FEATURES

This airless pump is perfect for pairing with essence and lotion formulas.

- > **MATERIALS**
Overcap: SAN/ABS/PN
Shoulder: PP/AL
Bottle: SAN
Base: ABS

- > **FILL VOLUME**
15mL, 20mL, 25mL, 30mL,
35mL, 40mL, 45mL, 50mL

HCT01-20

FEATURES

This airless pump is perfect for pairing with essence and lotion formulas.

- > **MATERIALS**
